

06 Explosion-Proof Electric Control Ball Valves

This series of actuators is designed for damper control in environments/workplaces with explosive hazardous gases, steam or combustible dust in HVAC, petroleum, petrochemical, metallurgy, ships, power plants, nuclear power plants, pharmaceutical plants, etc. It has obtained China Compulsory Certification (CCC), EU ATEX, IECEx certification, and Russian EAC certification. The electric regulating ball valves are specially designed for the flow control requirements of media such as water, steam, and 50% ethylene glycol in the HVAC system.

► Feature

On/Off and
Modulating Control

DN15~50 working
pressure: 2.0Mpa;
DN65~150 working
pressure: 1.6Mpa

Max working pressure
difference: 0.35Mpa

The installation must be carried out by personnel who have received relevant training or relevant work experience. During the installation process, be careful not to operate with power on, and install the actuator according to the regulations.
